File1.java

```java
1.    protected static void String fun(int stop) {
2.        int sum=0;
3.        int start;
4.        start=1;                //statementexpression
5.        while(sum<stop) {       //whilestatement
6.                                //blockstatement
7.            sum=sum+start;      //statementexpression
8.            start=start+1;      //statementexpression
9.        }
10. }
```

File2.java

```java
1.    protected static void String fun(int stop) {
2.        int sum=0;
3.        int start;
4.        while(sum<stop) {       //whilestatement
5.                                //blockstatement
6.            start=1;            //statementexpression
7.            sum=sum+start;      //statementexpression
8.            start=start+1;      //statementexpression
9.        }
10. }
```
